PROJECTS

Hotel Booking Analysis

Tools : Python – NumPy, pandas, matplotlib, seaborn

- Data Collection and Cleaning: Load data from Kaggle, including reservation systems, customer feedback platforms, and financial records. Cleaned and preprocessed the data using pandas to ensure data quality and consistency, handling missing values, outliers.
- Booking/ Revenue Analysis: Utilized pandas data manipulation and aggregation capabilities to analyze revenue and bookings. Conducted EDA to identify trends, demand patterns in hotel bookings and sales. [Cancellation rates rise as the price doses, which has significant impact on the hotels revenue.]
- Monitoring: Implemented pandas-based visualization to monitor booking and revenue performance in real time. Created charts and plots using Matplotlib and Seaborn to track bookings metrics, identify performance gaps and data driven decisions for booking and revenue optimization.
